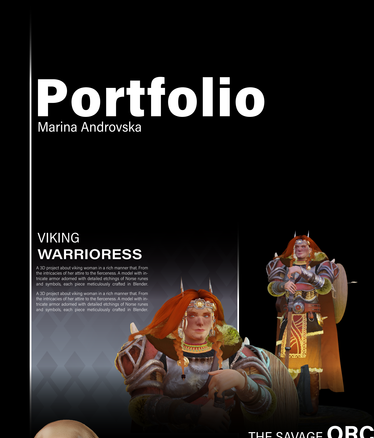
Marina Androvska

VIKING WARRIORESS

A 3D project about viking woman in a rich manner that. From the intricacies of her attire to the fierceness. A model with intricate armor adorned with detailed etchings of horse runes and symbols, each piece meticulously crafted in Blender.



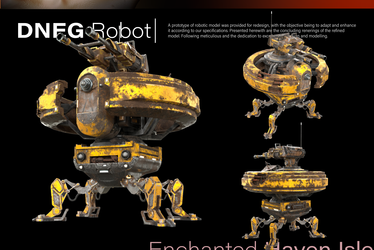
THE SAVAGE ORC

Behold the ferocious visage of my first creation—a formidable orc bust crafted meticulously through the virtuosity of ZBrush and Substance Painter.

With sinewy muscles rippling beneath weathered skin, its countenance **exudes a primal intensity**, captured in the intricate detailing of each vein and crevice. From the menacing glare of its eyes to the jutting contours of its jaw, every facet of this creation embodies the raw power and untamed spirit of the merciless determination. This orc stands as a testament to the union of digital artistry and imaginative prowess, a formidable testament to the possibilities within the realms of 3D modeling.

DNFG Robot

A prototype of robotic model was provided for redesign, with the objective being to adapt and enhance it according to our specifications. Presented herewith are the corresponding renderings of the refined model. Following meticulous and the dedication to detail inherent in 3D modeling.



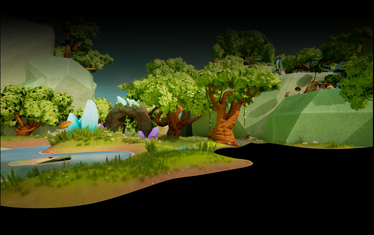
Enchanted Haven Isle

Dive into the enchanting world of my Blender project - a tiny stylized house isle. With meticulous attention to detail, I've crafted a miniature haven nestled amidst rolling hills and tranquil waters. Utilizing Blender's powerful modeling tools and sculpting techniques, meticulously crafting each quaint cottage and weaving cobblestone pathways.

Through advanced lighting and rendering, I've infused this miniature world with warmth and dimension, inviting exploration and sparking the imagination.

Or perhaps something **contemporary**, like **City of the Lights**:

War Among the Whales

War Among the Whales is a group project, made with Unreal Engine. After several months of hope and determination, a game artefact is carved out with goals, challenges, rewards, and opportunities for exploration within the game.


Game Description: It has been decided the game to be entirely stylized in our way and yet to have some similarity with Disney one.
